PowerPack Team Ownership (Design Center)

- PowerPack Ownership
  - Terminology
  - Collector Affinity Settings for PowerPacks
- Non-Solutions Teams PowerPacks
- Platform PowerPack Owners
- Community PowerPacks

NOTE: See PowerPacks included in SL1 ISO for information about what packs are shipped with the ISO.

NOTE: See Design Center for platform items.

PowerPack Ownership

- Solutions Teams PowerPack Ownership
- Non-Solutions Teams PowerPack Ownership
- Platform PowerPack Owners
- PowerPacks Without Team Assignment
- PowerPacks in 12.1 ISO Product Owner Sign Off

Terminology

- **GA** - (General Availability) Fully available - PowerPacks are released as GA immediately if vetted and validated by customers or internally
- **LA** - (Limited Availability) Assigned to selected customers and not available to all customers - If we deliver to a customer, no more emailing the PowerPack, list as a LA (limited availability) PowerPack and instruct them to go to the portal to download
- **Community** - PowerPack not owned by Engineering (Could be customer, COE, PS, SE, etc) - No expectations of support from SE or support. Nobody in Engineering will have any
- **Beta** - PowerPack only available to customer enrolled in the beta program
- **End of Life** - Support might be able to help, but we will not be actively supporting this.

Note: The following things are typically not PowerPack issues and should be directed to the appropriate team outside Solutions. See Design Center for more information.

- **AP2 Dashboard** – Unless collection is failing for the powerpack that feeds the dashboard then these issues belong with the appropriate platform team.
- **General collections health** – If the stack shows sigterms across many packs and apps and shows overall capacity issues then **these need to be investigated first, before engaging a PowerPack team**
- **Basic platform behavior that results in powerpack symptoms** – component creation, app alignment, merged devices, credential issues, etc. Please triage these issues in Support before determining a powerpack team is needed.
- **Execution Environment** - EE deployment issues are handled by team Collectables.

Collector Affinity Settings for PowerPacks

When a collector affinity setting is suspected as a problem for a particular PowerPack, please consult this list as a source of truth in determining the correct setting.

Platform PowerPack Owners						
Name	Component	Sub-Component	PM	Team	Ship with ISO?	Notes
Data Pull Support	Transport	Data Pull	Erick Burgess	WHAT		

EM7 Default Credentials	Credentials		John Proctor	Proc and Roll		
EM7 Default Dynamic Applications			Eric DeRose	Systems Engineering		Consolidate or Deconstruct
SL1 Default Internal Events	Platform		Eric DeRose	Systems Engineering	Yes	Ask Bryan Harding
EM7 Default Syslog Events	Event Management		Erick Burgess	Aviators	Yes	
EM7 Default Trap Events	Event Management		Erick Burgess	Aviators	Yes	
SL1 Event Trap Automation Action			?	Cyborgs		Updated last per: RBA-828
EM7 DRBD Status	Platform	HA-DR	Eric DeRose	Systems Engineering		
EM7 Nmap Device Classes	Device Classification		John Proctor	Proc and Roll		
EM7 Scheduled Dashboard Resources			Bryan Harding	Super Dash Bros.	Maybe	Reportedly includes resources necessary to facilitate scheduled dashboard reports. If this dependency is

						still valid, not something we'd want to intentionally break just to shave a PowerPack.
EM7 Standard Device Categories	Device Classification		John Proctor	Proc and Roll		
EM7 Virtual Device Classes	Device Classification		John Proctor	Proc and Roll		
EM7_Web_Server_4D8CE23D4744AC2BEA64A79A60BE2A7C			Eric DeRose	Systems Engineering		
Service Level Management	Reports		Anastasia Levy	Top Gun		One Report in the PowerPack
SNMP Research Base Pack			Taylor Johnson	Tetris		Deprecate
HP Pro Curve Base Pack			Taylor Johnson	Tetris		
Interface Billing	Service Provider Utilities (Bandwidth Billing)		John Proctor	Proc and Roll		

IT Service Dashboards Pack			Jonathan Chivers	AppWizards		Classic IT Services (ITSM)
SL1 Default Dashboards Base Pack			Jonathan Chivers	AppWizards		Default Business Services dashboards
ScienceLogic Support Pack			Eric DeRose	System Engineering		
Application Management Pack			Josh Borders	AppWizards		Excuse Me
Device View Dashboards			Bryan Harding	Super Dash Bros	Yes	Default device-level dashboard. Continue to include until Classic UI device management is removed else we bust that view.
EM7 Base Themes			Bryan Harding	Super Dash Bros	Maybe	Default SL1 themes for Classic UI. Not sure
SL1 Core Reports	Reports		Ahmad Sous	Final Destination	Yes	(BH) These are some of the most basic

						reports; I'd argue they shouldn't be a required separate download before I have even basic reports available in the "Reporting" feature.
EM7 Credential Tests	Credentials		John Proctor	Proc and Roll		
EM7 Dashboard Widgets			Bryan Harding	Super Dash Bros	Yes	(BH) While I'm for continuing to distance from need for the Classic Dashboards, this PowerPack includes some highly expected widgets for dashboards.
EM7 Default API Events			John Proctor	Proc and Roll		
SL1: Performance Reports			Ahmad Sous	Final Destination	Yes	(BH) These are some of the most basic reports; I'd

						argue they shouldn't be a required separate download before I have even basic reports available in the "Reporting" feature.
EM7: Sample Dashboards			Bryan Harding	Super Dash Bros	Yes	(BH) These are basic Classic dashboards to serve as sample server and network examples.
Host Agent			Erick Burgess	WHAT		
ScienceLogic: Agent			Erick Burgess	WHAT		
ScienceLogic DRBD Monitoring			Eric DeRose	Systems Engineering		
ScienceLogic: Quality of Service Events			Erick Burgess	Collectables		
ScienceLogic: Rules Engine Events			Bryan Harding	MOSS	No	(BH) Rules Engine has long since

						been deprecated.
Service Level Management			~~Bryan Harding~~	~~Exceptions~~	No	
Service Proxy Widget PowerPack			Bryan Harding	Super Dash Bros	No	
SL1 Unified Theme			TBD	Super Dash Bros		(BH) Need to dig. Believe this was once used for the Unified UI theming.
ScienceLogic SL1 Base Pack			Eric DeRose	Systems Engineering		
EM7 Web Server			TBD	Systems Engineering
