Restorepoint Support

Introduction

This is the main landing page for **Restorepoint Technical Support**.

September 2021 - ScienceLogic acquires Restorepoint

RP website: Multi-Vendor Network Configuration and Compliance Management

"*Restorepoint automates network configuration backup, recovery, compliance analysis, and change management for more than 100 network and security vendors. Save hours of network administration, auditing time, and reduce risk by using a single solution for multi-vendor management*."

SL1 and Restorepoint can integrate and many of our customers currently use Restorepoint alongside SL1.

Latest Updates

Date	Update
July 1st 2024	The old RP Portal (FreshDesk) is now fully deprecated. All RP customers now use SF and the ScienceLogic Support Portal.
Mar 29th 2024	RP Only customers can no longer open cases on the old RP Freshdesk system. **All RP customers and**

	cases are now through the SL Support Portal (and SL's SalesForce)! Relevant KB: https://support.sciencelogic.com/s/article/13587
Mar 14th 2024	We have begun to migrate our Restorepoint only customers from the legacy Restorepoint Support Portal over to our ScienceLogic Support Portal. This is a major milestone in the retirement of the remaining legacy aspects of Restorepoint Support and means that all Support for all SL products will go through the SL Support Portal using SL SalesForce. Relevant KB: https://support.sciencelogic.com/s/article/13587
Feb 1st 2024	Restorepoint only customer now have phone support for the very first time! For more details see here: Restorepoint Phone Support
Oct 1st 2023	New page for SE's and PS with resources, gotchas, nuances and FAQ's: SE & PS Resources
Sept 27th 2023	Our Support Team is growing! We welcome Sohail Sheikh in EMEA and Chris Bairstow in the US as fulltime RP TSE's to help supplement the team. This will help us provide more

	timely Support to our RP customers across all our busiest regions.
July 7th 2023	Case opening process has been updated. All customers who have both SL1+RP should now have all cases opened in SalesForce. If the customer is opening the case themselves, they can open their RP Support case through the SL Support Portal by chosing the Category 'Restorepoint'. If a CSM or SE is opening a case for their customer, they can open it in SF only, Freshdesk will no longer be used for SL1+RP customers. Details here: Opening A Case With Restorepoint Support ARCHIVED
Mar 31st 2023	CSM's now have access to FreshDesk to view cases and check status etc. Check the FAQ below.
Feb 2nd 2023	RP ENG have now migrated to Jira

Restorepoint Support Team

The Restorepoint Support Team are:

Name	Region
Laurence Stretton	EMEA (UK GMT)
Sohail Sheikh	EMEA (India IST)
Dharmendar Parmar	EMEA (India IST)
Satheesh Kumar Uma Chandran	EMEA (India IST)
Chris Bairstow	NAM (EST)

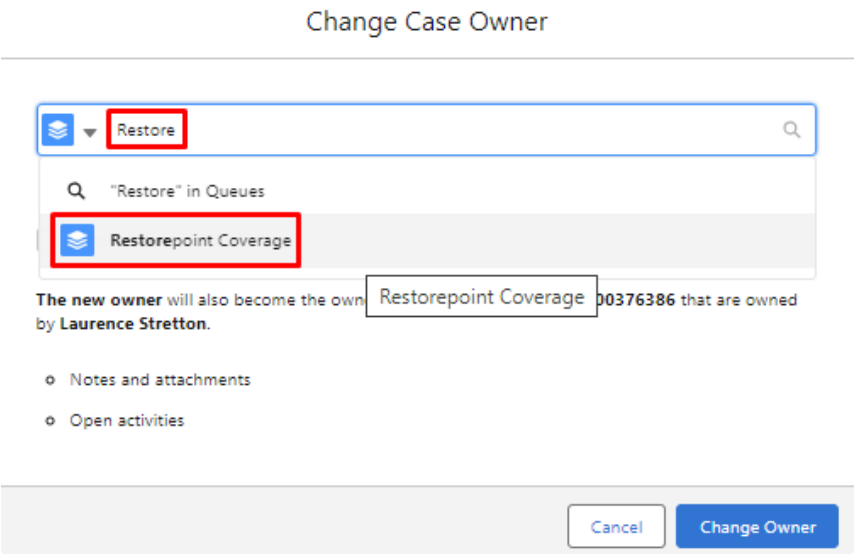
- Current Support to ENG escalation process
- Latest Goals for the RP Support Team
- New (Feb 2024) RP Phone Support Project Details
- Support migration project to SF for SL1+RP customer only
- Various links to RP trainings:

- Details and progress of the migration of Knowledge from FreshDesk to SalesForce
- [Archived] Data on goals achieved, volume and MTTR
- [Archived] Data on current RP Support-ENG process and challenges along with historical data

For SL1 TSE's

For Restorepoint cases to route to an RP TSE, we use the Category field. I.e., when **Category = Restorepoint, the case will route in OmniChannel to the Restorepoint Coverage queue**. If you see a Restorepoint case come into the SL1 Support Queue, you can re-route it to RP Support by changing the Case Owner using the Restorepoint Coverage queue in SF:



Process for SRE to Upgrade SaaS RP Platforms

For now, SRE require assistance from RP Support to upgrade SaaS RP platforms. RP Support own the server required to push the update and once complete, SRE can then takeover again and work with the customer to complete the upgrade. This current process has been outlined in the following page: SRE/RP-Support - Upgrading RP Platforms for SaaS Customers

Important Resources for SE's and PS

We have created a page to help SE's and PS to answer common questions and address common issues and nuances of the Restorepoint product. this page will help when you hit issues in demoing the product and trying to get it installed, up and running.

The link to the page can be found here: SE & PS Resources

FAQ

Q: I am a CSM, can I escalate my customers RP case in SalesForce?

A: Yes you can. Use the 'Escalate to Management' button the same way you would for an SL1 case. Your customers can also hit that button in their case view on the SI Support Portal.

Q: My customer knows very little about Restorepoint, how do they get started?

A: You can refer them to the 'Restorepoint Support' page on our Support Portal where they can access the Latest Documentation and Knowledge Resources: https://support.sciencelogic.com/s/restorepointsupport

Q: Where can our customers find the latest RP version?

A: RP instance will automatically install new updates.

World Cup 2022

Restorepoint provided config backup solutions to FIFA for World Cup 2022 through our customer DiyarME. We had a special coverage process in place for the four weeks of the WC and details can be found on the following page: DiyarME - World Cup 2022 On-Call Coverage and Support

The tournament went off without any issues for RP and this was a complete success with no Support cases raised and no on-call triggered.
