Dependencies for SL1 PowerFlow SyncPacks

The following tables list the additional PowerFlow and SL1 products that are required by PowerFlow SyncPacks, along with any other software requirements.

NOTE: You can download the latest version of all SyncPacks from the PowerPacks page (Product Downloads > PowerPacks & SyncPacks) of the ScienceLogic Support Site. The last three releases of a SyncPack are considered to be current.

Click the **Expand** button ( ) or the product name below to view the corresponding table, and click the link for the version number to view the release notes. To view all of the SyncPacks on this page, click the **Expand all** button ( ) on the toolbar at the upper right of the page. Expanding all of the entries is helpful if you want to search for a specific version or application.
