SL1 PowerFlow: SyncPacks

This page lists the SyncPacks that you can use with *SL1 PowerFlow* to sync data between a specific third-party application and SL1:

- *Restorepoint SyncPack*
- *ServiceNow SyncPacks*
- *Additional Third-party SyncPacks*
- *Related SyncPacks*

Restorepoint SyncPack

For a complete list of requirements for this SyncPack, see *Dependencies for SL1 PowerFlow SyncPacks*.

SyncPack Manual	Description	SyncPack File	PowerPack File
Restorepoint	Adds SL1 devices to Restorepoint when those devices are discovered in SL1. Updates SL1 events with data from Restorepoint.	Restorepoint	Restorepoint PowerPack

ServiceNow SyncPacks

All ServiceNow SyncPacks require the latest *Base Steps* and *ServiceNow Base* SyncPacks. Some ServiceNow SyncPacks require a *PowerPack* with SL1 content, such as run book automations and actions, that you will need to download and install on your SL1 instance. Also, most ServiceNow SyncPacks require a certified (or scoped) application from the ServiceNow Store at https://store.servicenow.com.

Click to expand and view information about IT Operations Management (ITOM) licensing for certified applications

For a complete list of requirements for each SyncPack, see *Dependencies for SL1 PowerFlow SyncPacks*.

SyncPack Manual	Description	SyncPack File	PowerPack File
ServiceNow Base	Contains PowerFlow applications, steps, and other utilities that are used by all ServiceNow SyncPacks.	ServiceNow Base	
ServiceNow Cases	Syncs SL1 events with ServiceNow cases, including event creation, acknowledgment, and resolution.	ServiceNow Cases	ServiceNow Base Pack PowerPack
ServiceNow Change Management	Places SL1 devices into and out of maintenance mode by enabling PowerFlow to generate an SL1 event when a maintenance-related change request occurs in ServiceNow.	ServiceNow Change Management and ServiceNow CMDB SyncPack	
ServiceNow CMDB	Syncs SL1 organizations with ServiceNow companies, SL1 devices with ServiceNow CIs, and syncs SL1 device details with ServiceNow, along with additional syncs to keep SL1 and ServiceNow accurate.	ServiceNow CMDB	
ServiceNow Events	Syncs SL1 events with ServiceNow events, including event creation, acknowledgment, and resolution.	ServiceNow Events	ServiceNow Base Pack PowerPack
ServiceNow Incidents	Syncs SL1 events with ServiceNow incidents, including event creation, acknowledgment, and resolution	ServiceNow Incidents	ServiceNow Base Pack PowerPack
